Quality Air Filters From: Purolator, Flanders, Indigo, AirFlow Technologies

HEPA Filter, 95% DOP - ASHRAE Cell Identification - Order Replacement Worksheet

This worksheet is designed to help you gather information to order the correct HEPA, 95% DOP or ASHRAE grade air filter for your application. Please answer all questions completely and accurately to avoid ordering NON-RETURNABLE PRODUCTS.

1. Current Manufacturer-

In the space at the right, write in the manufacturer's name and model number from the filter you are replacing.

2. Actual Filter Size -

Measure the actual outside dimensions of the filter to the nearest 1/16th of an inch and use that to complete this form. Height of the filter is determined by the direction the pleats run as shown in the illustrations here. Note that on filters with headers, you should measure the outside dimensions of the header.

3. Filter Efficiency -

Precisionaire offers HEPA, DOP and ASHRAE grade filters in the 5 efficiencies shown here. ASHRAE efficiencies are nominal dust spot efficiencies by ASHRAE standard 52. 95% DOP and HEPA efficiencies shown here reflect SOP penetration results. Choose one from this list to complete this form.

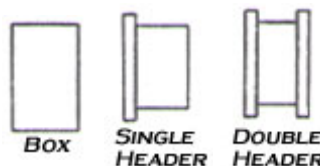

- ASHRAE 65% - DOP 95%
- ASHRAE 85% - DOP 99.97%
- ASHRAE 95%

4. Construction -

Make one selection from each of the construction categories below (A through E), and use it to complete this form.

A. Design-

- Box
- Single Header
- Double Header

B. Frame Material-

- Particle Board
- Fire Retardant Particle Board
- 26 Gauge Galvaneal
- 16 Gauge Galvaneal

C. Capacity-

- Standard Capacity
- High Capacity
